

ENVIRONMENTAL PERFORMANCE VIAPORT 2019

The most significant environmental achievements of 2019 have been:

- **Reduce fuel consumption per kilometer traveled by 14.5%** compared to the average consumption for the years 2016 to 2018. This result has been made possible by the progressive replacement of the fleet used by vehicles with more efficient engines, as well as the application of efficient driving guidelines.
- **Stop emitting 150 grams of CO₂ into the atmosphere per kilometer traveled.** Taking into account the kilometers traveled during 2019, **161 Tn CO₂** have been discontinued.
